

ROCKY POND

Plymouth

Area 20 acres

NOT TO BE USED FOR NAVIGATIONAL PURPOSES

ROCKY POND
(Plymouth)

General Information:

This small 20-acre pond has a maximum depth of 19 feet. It is located off of Long Pond Road, which can be reached via Bourne Road. There is an informal access suitable only for car top boats and canoes on the pond's northern end.

This pond was reclaimed in 1962 and 1965.

Fish Populations:

This pond was last surveyed in 1970 when five species were reported: brown bullheads, yellow perch, killifish, largemouth bass and chain pickerel. Pumpkinseeds are presumed present as well.

Fishing:

Due to the lack of current data on this pond we can offer little in the way of fishing information, but it should be a good bet for bass and panfish action.
